GROUP PROJECT REPORT

PHASE 5: PROJECT DEVELOPMENT PHASE

Project: Auto Ticket Classification using Flow Designer

1. Backend Development

The Incident Workflow custom table is created and configured with the required fields, choices, references, and auto-numbering.

2. Flow Designer Creation

- Open All menus and search for Flow Designer.
- Open Flow Designer under Process Automation.
- Select New → Flow.
- Name: Auto Classify School IT Tickets.
- Application: Global.
- Click Build Flow.

3. Trigger Configuration

- Trigger: Record Created.
- Table: Incident Workflow.
- Condition: Category is Empty.

4. Automatic Classification Logic

Keyword / Description	Category	Subcategory
WiFi / Network	**Network**	**Wi-Fi**
Projector	**Hardware**	**Projector**
Password / Login	**Access**	**Forgot Password**
Slow / Hanging	**Performance**	**Slow Computer**

5. Email Notification

- Action: Send Email.
- To: Caller → Email.
- Subject: Your Request for the issue has been submitted.
- Body: Ticket confirmation message.

6. Flow Activation

After the flow configuration is completed, the Activate button is selected from the top-right corner.
